1 DAY TO DISCOVER WILD EDIBLE PLANTS

Wild picking day

1 day to discover wild edible plants from April to October. In Auvergne, on request and on the date of your choice. From 2 to 3 people, you will share this day with Christophe Anglade, mountain tour leader, naturalist and co-author of the guide "Edible Plants, picking and recipes of the 4 seasons" (Ed. Debaisieux). Together, you will learn to identify, gather and use the wild flora around you to enjoy the forgotten flavors of our living heritage. Under the watchful eye of your guide you will make together dishes prepared from the fruit of your gleaning.
